

- Easy to Use
- Prevents Patient Movement
- Enhances Airway Management
- Reduces Head/Neck Angle

A unique, intuitive positioning solution to enhance airway management for patients in surgical procedures. Prevents patients from migrating/slipping on the surgical table while in Trendelenburg position up to 40° angulation.

### Intuitive Design

- Reduces OR set up time (less components)
- Less risk of incorrect setup that can lead to patient injury

### Deep Head Cutout

- Stabilizes the patient's head
- Maintains ideal position for airway maintenance

### Positioning Kit

- Packaged with one patient chest strap
- Optional lift sheet and arm protector components available

### Ramp

- Reduces head/neck angle
- Sniffing position to assist in intubation of difficult airways

### Ramp Wings

- Provides extra support for shoulders

### Securement Bar

- Prevents patient movement when in steep angulation
