

CONTINUUM[®]

Automated Inventory Charge Capture System

The Continuum[®] System is a patented technology composed of interconnected hardware and software that seamlessly integrates within a facility's collective information management ecosystem.

The system is designed to add intelligence and efficiency through RFID product tracking, charge capture, workflow, and billing optimization.

& Similar Checks

Secure Inventory from Theft or Loss

Continuum® Vault and VaultEX systems are real-time inventory and charge capture solutions that use RFID technology to provide security and accountability for orthopedic products and supplies.

Track Available Stock and Send Re-Orders

Receive, count and reconcile inventory with DeRoyal's portable RFID scan device, Continuum® AIR. Work in tandem with Continuum® mobile app to simplify inventory management in any inventory area.

Increase Charge Capture Accuracy

Automate the capture of OR supplies at the point of use with the Continuum OSCAR smart trash receptacle. Minimize manual entry time and increase operating room turnover. Pick it. Use it. Throw It Away.™

ONE PATIENT. ONE PUMP. With DeRoyal's Continuum® NPWT Solution

The Proven Benefits*

Faster Discharge
reduced hospital length of stay by **1.47 days**

Same pump is used by patient in Hospital and at Home

\$36,000 reduction in capital equipment loss

Elimination of unnecessary discharge dressing change

CONTINUUM SUPPORT & TRAINING

Beyond the technology, the DeRoyal Continuum® Implementation team is dedicated to delivering the professional expertise to seamlessly integrate into the customer's current workflow in 6-8 weeks, including:

VALUE ASSESSING

Site assessment to understand facility needs (savings assessments, inventory optimization, etc.)

PROJECT PLANNING

A dedicated project management team that will drive preparations leading to the system "Go Live".

ACTIVATION AND TRAINING

Installation of the Continuum® system and all necessary on-site training.

Customers have access to **24/7** technical support as well as routine assistance from local representatives to apply Continuum® system's business tools in ongoing operations.
