

# Connecting a procedure kit to the Streamway® system

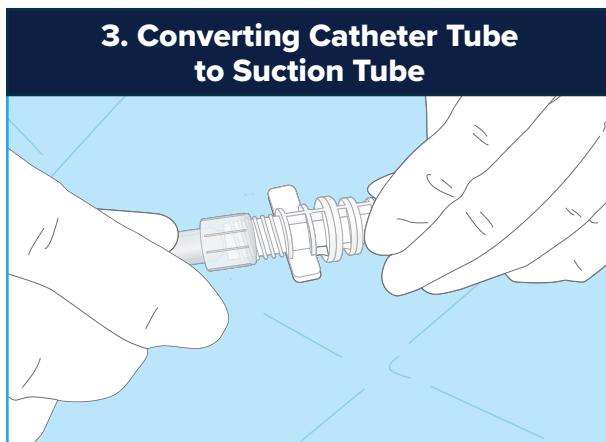

**STREAMWAY®**  
AUTOMATED SURGICAL FLUID DISPOSAL

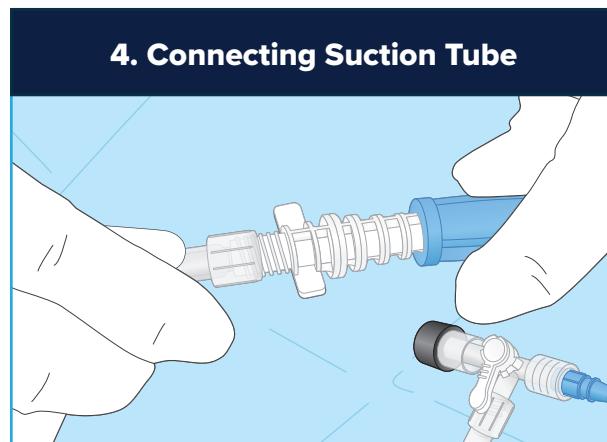

**1. Drawing a Sample**  
Prior to the procedure, connect a syringe to the luer lock on the stopcock found in a paracentesis kit to draw a sample.

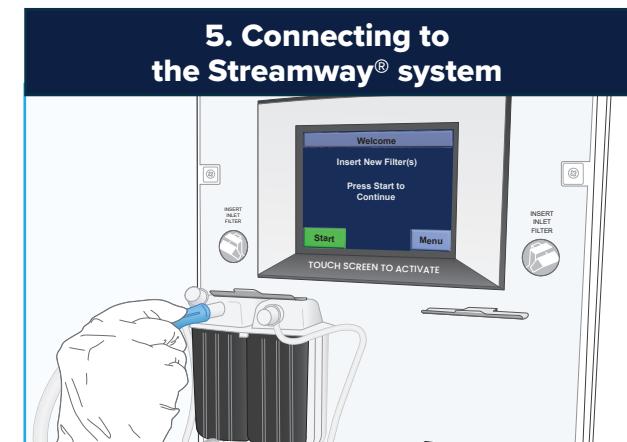

**2. Connecting Catheter Line**  
Use the luer lock fitting of the stopcock to connect the catheter suction line.

**3. Converting Catheter Tube to Suction Tube**  
Use a luer lock to barbed suction tubing adapter to connect the catheter line.

**4. Connecting Suction Tube**  
Use the barbed end of the luer lock to barb adapter to connect standard suction tubing.

**5. Connecting to the Streamway® system**  
Connect the other end of the section tubing to the Streamway® system and set to a clinically acceptable vacuum pressure.
